Pursuant to preliminary amendment (filed 9/1/04), claims 1-15 have been cancelled, and claims 16-62 added. Claims 16-62 are now pending.

Restriction to one of the following inventions is required under 35 U.S.C. §121:

- 1) Claims 16-20, drawn to a method of polymerizing amino acid NCA monomers.
- 2) Claims 21-28, drawn to a five- or six membered amido-containing metallacycle
- 3) Claims 29-31, drawn to a method of making an amphiphilic block copolyptide.
- 4) Claim 32, drawn to a method of adding an amino acid NCA monomer to a soluble block polypeptide.
- 5) Claims 33-39, drawn to a polypeptide composition that comprises a block copolypeptide.
- 6) Claims 40-47 and 50, drawn to an amphiphilic block copolypeptide.
- 7) Claims 48-49, drawn to a chain end-functionalized block polypeptide
- 8) Claims 51-52, drawn to a method of forming vesicles
- 9) Claim 53, drawn to vesicle-containing compositions
- 10) Claims 54-57, drawn to a method of making ethylene glycol-functionalized amino acid monomers
- 11) Claims 58-61, drawn to a method of making a soluble block copolypeptide comprising the use of an EG-functionalized NCA monomer.
- 12) Claim 62, drawn to a method of preparing a peptide bearing a defined end group.

.

The claimed inventions are distinct.

Groups 1, 3, 4, 11, and 12 are drawn to methods of making polypeptides; Group 8 is drawn to a method of making vesicles that contain polypeptides.

Group 2 is drawn to a synthetic intermediate that can be used to make polypeptides.

Groups 5-7 are drawn to polypeptides.

One or more of Groups {5-7} and {1, 3, 4, 11, and 12} is/are related as product and process of making that product. In the event that a Group consisting of product claims is elected, and claims therein found allowable, claims drawn to a method of making those allowable products will be rejoined for further examination.

Groups 9 and 6 are related as combination/subcombination. The peptides of Group 6 can be used as such, or can be used in an emulsion.

Applicant is advised that for the response to this requirement to be complete, an election of the invention to be examined must be indicated, even if the requirement is traversed (37 C.F.R. 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
